Kingfisher County, Oklahoma

You have an ownership interest in multiunit horizontal wells. Multiunit horizontal wells are so named because the horizontal portion of the well bore (completed interval) extends through more than a single section, or unit. Ownership of each section in a multiunit well is allocated based on the proportion of completed interval that such section bears to the total completed interval of the multiunit well. Your interest in a multiunit well is calculated based on the acreage you own in each section, divided by the total acres for each section, multiplied by your royalty rate (or OR, or WI) and then multiplied by the percentile of completed interval (GPI) for that section. For example, if you own 5 acres in a section that has 640 total acres, and 62% of the completed interval (GPI) lies in your section, and you are leased or pooled at a 1/8 royalty rate, then your payment decimal would be calculated as follows: $5 / 640 \times 0.125 = 0.00097656$ (Section Decimal) $\times 0.62$ (GPI) = 0.00060547 (Well Decimal)
